Corporate Finance, by Ross, Westerfield, and Jaffe is a popular textbook that emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool. Brad Jordan, known for his successful work on the RWJ Fundamentals and Essentials books, contributed to this edition. His influence will be seen particularly in the writing style with

smoother coverage of topics, and the increased quality in the problem material.

With contributions by distinguished scholars from legal and financial backgrounds, this collection of essays analyses four main topics in the corporate governance of European listed firms: (i) board structure, composition and functioning and their interaction with ownership structure; (ii) board remuneration; (iii) shareholder activism and (iv) corporate governance disclosure based on the 'comply or explain' approach. The authors provide new comparative evidence and analyse its implications for the policy debate. They challenge the conventional wisdom that corporate governance in European firms was systematically dysfunctional. While proposals aimed at increasing disclosure and accountability are usually well-grounded, caution is suggested when bringing forward regulatory changes with respect to proposals targeting specific governance arrangements, especially in the fields of board composition and shareholder activism. They argue that the

'comply or explain' principle should be retained and further efforts should be exercised to enhance disclosure.
